Welcome to the Freiburg International Academy

In a growing trend, doctors come from various countries to Germany. The shortage of health care professionals in our country has strengthened this development. The prerequisite for their efficient use for inpatient and outpatient care is their optimal integration into the German health care system.

The Freiburg International Academy has recognized this trend in time and offered various qualification programs.

The goal of this institution is to establish common scientifically based teaching approaches with the participation of renowned professors, experienced specialists and medical educators.

We stand for better integration of international health care professionals through attainment of competence.

Greeting

Around the Christmas time of 1996, I embarked on the journey from Saudi Arabia to Germany to study medicine, experiencing my own arrival in a foreign country with an unknown culture. After completing my medical training and specialist program, I began to use my expertise and experience to support foreign colleagues professionally and culturally. In collaboration with experts from the University Hospital Freiburg, I finally founded the Freiburg International Academy (FIA).

The FIA supports foreign health professionals in their job recognition and career planning. It prepares an individual qualification plan consisting of general and professional language as well as knowledge courses. In addition, it offers the participants comprehensive support in all other administrative processes.

Sponsors

The sponsors allow many of our participants to attend the courses free of charge. Due to the different conditions and requirements of the application, the FIA advises and supports its participants comprehensively in all questions concerning the various funding opportunities.

Our AZAV-certified intensive and crash courses can be supported by the **Employment Agency** or **Jobcenters** at all locations.

At the Freiburg, Heidelberg and Frankfurt locations, the FIA is accredited as a provider for the **Federal Office for Migration and Refugees (BAMF)** and offers specialized professional language courses for medicine, dentistry and pharmacy.

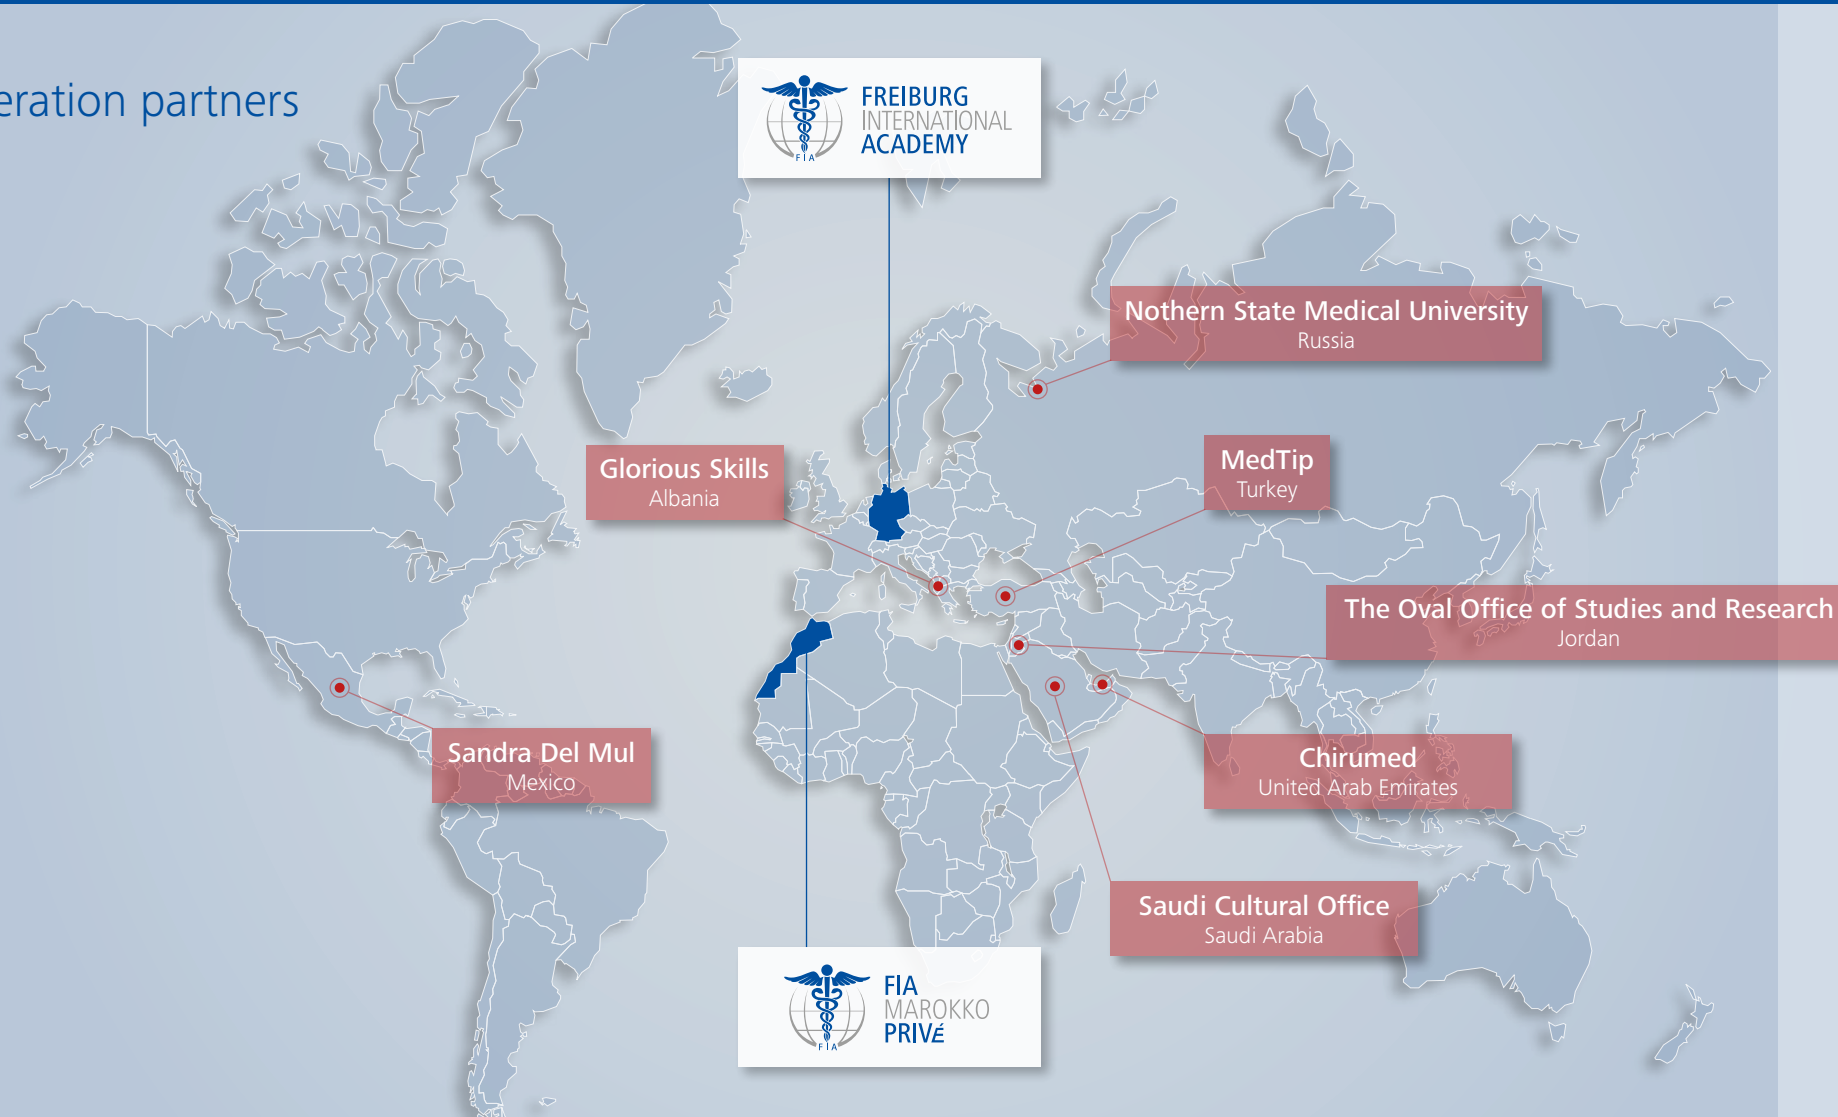

For preparatory courses for the knowledge examination in medicine, dentistry and pharmacy, subordinate funding is possible through the **IQ state networks** of Baden-Württemberg, Hesse and Lower Saxony.
